

## Denscan

Density measuring system for lumber

### Customer benefits

- ✓ Strength grading solution in combination with Viscan for transverse application (Viscan+)
- ✓ Inline evaluation and calculation of the density data
- ✓ Easy to install in all production lines

The Denscan is a system for the determination of the average density of lumber based on X-ray technology.

Species

- ✓ Hardwood
- ✓ Softwood

Feeding

- ✓ Lineal
- ✓ Transverse

Purpose of scanning

- ✓ Quality
- ✓ Strength grading
